Launching the Scotland Model Arctic Council

7th UK Arctic Science Conference
Durham University  |  11 April 2022
SCOTMAC is newest Polar Aspect MAC programme for university students

Launching the Scotland Model Arctic Council

1. An introduction to Polar Aspect Model Arctic Councils

2. The Scotland Model Arctic Council programme

3. Results from the first Scotland Model Arctic Council
Polar Aspect MACs are experiential learning events at which pupils or students simulate real Arctic Council gatherings.

NORMAC Senior Arctic Officials Meeting (Norwich, UK, March 2019)

Arctic Council Senior Arctic Officials Meeting (Rovaniemi, Finland, November 2018)

Since 2016, Polar Aspect have designed and run numerous MACs for schools and universities, in person and online.

- **Normac**: Norwich School, UK
- **Macbilbao**: Colegio Ayalde, Spain
- **Normac**: Trent University, Canada & University of East Anglia, UK
- **GeoGmac**: Trent University, Canada (online module-based MACs)
- **OMac**: Online, worldwide (including delegate training)
- **Trykomac**: Trent University, Canada & Yukon University, Canada
- **Wycomac**: Wycombe Abbey, UK
- **Scotmac**: Scottish-Arctic Network, UK & Trent University, Canada

Research shows diplomatic simulations such as Polar Aspect MACs deliver valuable educational benefits.

- Significant and better-retained learning
- Teaching tailored to variety of learning styles
- Improved independent learning skills
- Cooperative learning and co-creation of knowledge
- Improved communication and interpersonal skills
- Understanding of ambiguities and power dynamics of IR
- Appreciation of diverse or conflicting perspectives and beliefs
- Enjoyable, motivating and empowering learning

Source: Polar Aspect
Polar Aspect MACs designed to reflect unique features of Arctic Council

Consensus
- All decisions by consensus of Arctic States—substantive and procedural
- Participants challenged to find bridging solutions

Collaboration
- All declarations collaboratively drafted at conference
- Emphasis on persuasion, negotiation and joint problem-solving

Indigenous peoples
- Delegates play Indigenous peoples as well as Arctic States
- Learn what small but determined groups can achieve on global stage

Focus
- In-depth engagement with one of world’s most important regions
- Focus on sustainable development and environmental protection

Source: Polar Aspect

anthony.speca@polaraspect.com | @polaraspect
Polar Aspect MAC agendas naturally revolve around issues of sustainability—both social and environmental.

- Vulnerable Indigenous cultures
- Limited access to public goods (e.g. education, health care)
- High cost of living
- Motion of economic growth
- Rapid climate change
- Poor community infrastructure
- High pollutant concentrations
- Fragile ecosystems
- Dependence on natural resource extraction
- Constrained physical and digital connectivity

SCOTMAC 1 registration oversubscribed by more than 4x!

Source: Polar Aspect
Note: Does not include 8 students selected, but who withdrew just ahead of conference, nor 1 student who could not participate due to falling ill day before conference
Learning began with conference preparations, culminating in pre-circulated discussion papers from each delegation.

SCOTMAC 1 focused on challenges associated with growth of Arctic shipping, and with intergenerational IK transfer.
SCOTMAC 1 took place against backdrop of war in Ukraine, and pause in Arctic Council diplomacy

- Strong ‘no to war’ statement clearly made at start of conference
- Special significance—youth demonstrating commitment to dialogue and capacity for concord
- No fictive Russian Chairmanship—all Polar Aspect MACs chaired neutrally by Polar Aspect
- No discussion of military matters (in keeping with real Arctic Council prohibition)
- Underscoring ‘A7’ agreement that Arctic Council remains of enduring value

Media coverage highlighted SCOTMAC 1 as youth diplomacy—’Seeking consensus in troubled times’

SCOTMAC 1 proceeded through full cycle of Arctic Council meetings, from Working Groups to Ministerial.

Polar Aspect MAC meeting structure

- Arctic Council (every 2 years): Foreign Ministers and PP leaders approving declaration and directing future activities
- Polar Aspect MAC: Decision on declaration, closing statements

- Arctic Council (every 6 months): ‘Arctic ambassadors’ overseeing operations, shaping policy and negotiating declaration
- Polar Aspect MAC: Negotiation and drafting of declaration

- Arctic Council: Technical experts carrying out research and projects
- Polar Aspect MAC: ‘Pre-SAO’ initial exchange of views to define issues and identify areas of agreement and disagreement

Testimonials from SCOTMAC 1 students were extremely positive overall—a selection

- ‘Amazingly organised and appreciated every minute of this experience.’
- ‘The initial presentations by experts helped everyone gain more knowledge on the Arctic including environmental and social issues. The introductory speech on the Arctic as a homeland was incredibly inspiring and thought-provoking.’
- ‘Having to carry out prior research and research during the conference developed my understanding of the Arctic as a homeland, and so my image when I close my eyes is no longer just an idyllic icy background with a polar bear, but a diverse array of people, ecosystems, infrastructure and issues.’
- ‘I walked away from this conference with a much deeper understanding about myself and how to effectively communicate with others in the future.’
- ‘I felt that Anthony was also very helpful at guiding us when we need it but allowing us to do it alone as well.’
- ‘I believe everyone should have the opportunity to do something like this while they are young!’
- ‘It was without doubt the best extra-curricular activity I’ve done whilst at university. Sad to leave!’

Source: Polar Aspect
‘As a Co-host of SCOTMAC I was reminded of the pleasures of being a student and having your eyes opened to new thoughts, fields of activity and experiences.

‘I learnt so much myself as the world of diplomacy is not one that marine scientists habitually engage with. Learning how diplomacy works can give scientists a voice in international decision making.

‘The SCOTMAC experience encouraged me to attend a UN Oceans Conference briefing discussing a draft political declaration for this summer’s summit and to now explore how my institution may be able to contribute at that level.

‘SCOTMAC may have been for the students, but I benefited too and am filled with new ideas and plans. Thank you, Anthony and Polar Aspect, for such a wonderful experience.’
SCOTMAC now intended to rotate around Scottish-Arctic Network, with SCOTMAC 2 ideally next year

Thank you very much to ScAN, SAMS, UHI and Oban!

Finally, please allow me to introduce myself

Dr Anthony Speca

- I’m on faculty of University of East Anglia, Trent University (Canada) and Norwich School
- I teach Geography and Circumpolar Studies at university, and Philosophy, Politics and Economics at school
- I’m also Managing Director of UArctic Læra Institute for Circumpolar Education
- I was formerly civil servant with Government of Nunavut in Canadian Arctic
- I’d be delighted to hear from you about Polar Aspect MACs!

SCOTMAC 1 Co-host and ScAN/SAMS-UHI faculty member
Prof Finlo Cottier regrets being unable to attend today
